

OCTOBER 2008

A preview of new products

**NEW MB15b SHIPPING
OCTOBER 1 2008**

The new MB15b has all the same functions as the old version. The new MB15b has an added 3.5mm jack on the channel 2 input section. It also has an added RCA line output on the output of channel 2. This allows you to convert a headphone signal to a line level signal on channel 2 using the 3.5mm input and the RCA output. The 3.5mm input can also be used with the XLR outputs for converting a stereo headphone or line signal to balanced XLR left and right outputs that can be controlled by the volume of channel 2. In all the new MB15b does all the same tasks as the old version but with its added features it can convert many different signals for a much more versatile unit.

The price of the MB15b has gone up. Effective October 1 the dealer price is going up about 12%. Please see the new Rolls dealer price list or call us for the exact amount of the increase.

The new MX34b has an added 3.5mm(1/8") input on channel one that can be used with a headset microphone for a functional headset mic mix and a main mix out.

**NEW MX34b SHIPPING
OCTOBER 1 2008**

The new MX34b has all the same functions as the old version. The new MX34b has an added 3.5mm(1/8") jack on the input section of channel 1 that is intended for utilizing a headset mic. By plugging the headset mic into the channel one input on the MX34b, and plugging the headset headphone section into the headphone output of the MX34b you can have a mixed output from the headset on the main output of the MX34b while utilizing all the headset's functions. If you are not interested in using a headset you can also use the input as a regular 1/8" mic input.

The price of the new MX34b is the same as the old version. NO PRICE INCREASE!!!!
