

NOVEMBER 2008

A preview of new products

We are currently working on a new product called the MP88. It is a midi control pedal that is designed specifically to control stage lighting. It is fully designed and in our prototype process, we should have a functional unit for beta testing in November. The MP88 should be out for sale in late December.

**NEW ROLLS PRODUCT
SS32 SHIPPING
NOVEMBER 1 2008**

The new SS32 is a 3 way stereo switching accessory. It will switch between three stereo inputs to one stereo output. It will also work in reverse switching one stereo input to three stereo outputs one at a time. Each input and output channel has an 1/8" stereo jack and stereo RCA jacks. The SS32 is passive allowing it to operate in mono with no damage to the unit. As the name implies MINI ROUTE 3 it is small in size measuring 3.75" X 2.25" X 1.25".

**MOST IMPROVED PRODUCT
OCTOBER SALES**

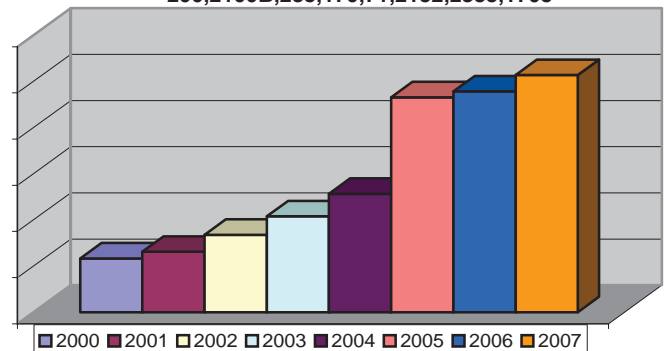

The new MB15b is experiencing record sales. After re-designing the old MB15 we are currently experiencing a 200% increase in sales of the more popular MB15b version.

Rolls amplifier sales will be up again in 2008

The Rolls RA and MA series has experienced dramatic sales increases over the past few years and 2008 will be another record year for that series.

Back by popular demand the SE162!

We did our best to discontinue the SE162 and we almost got away with it. After hearing Marsha complain about all the interest in the discontinued product from dealers trying to order them we have decided to build it once again. We will have SE162's in stock and ready to ship in December.
