

JANUARY 2009

A preview of new products

New products and updates to existing products we are working on:

For 2009 we are planning on expanding the Bellari line with three products. One is a single channel signal rack space tube mic preamp. A high end version of the VP series phono preamps that will be compatible with Moving Coil cartridges and finally a long awaited tube headphone amp. These will be in development for a few months but we are optimistic they will be ready sometime in 2009.

PLUG YOUR MIXER DIRECTLY INTO YOUR COMPUTER WITH THE NEW MB35 WITH USB!!!

The MB35 USB PROMATCH is a new product similar to the popular MB15b. It has all the same features with the addition of a USB jack on the front for connecting to a USB 2.0. The USB can be used as an input or an output to your computer.

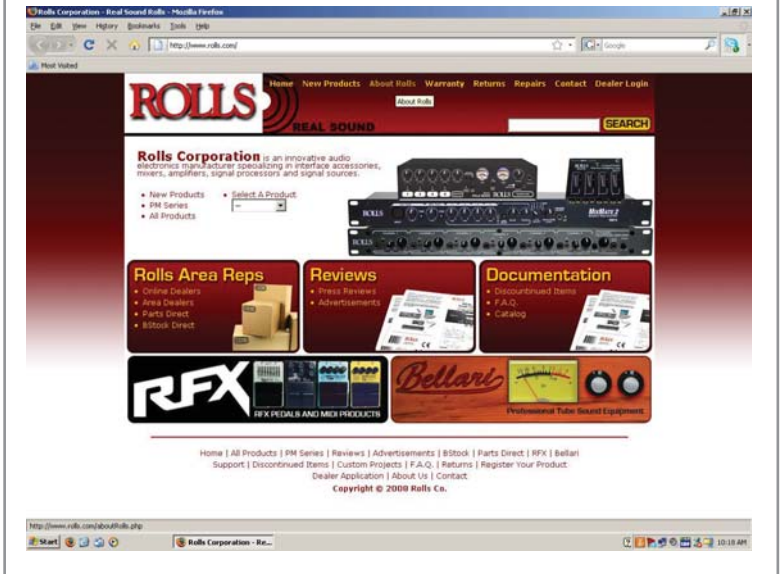

MB35 USB IS NOW SHIPPING

The RM203x will be changed to the new RM219 next month. The new version utilizes a PS27 DC power supply to make the unit even quieter and allow it to be used in DC only applications.
