

MARCH 2009  
**NEW!**

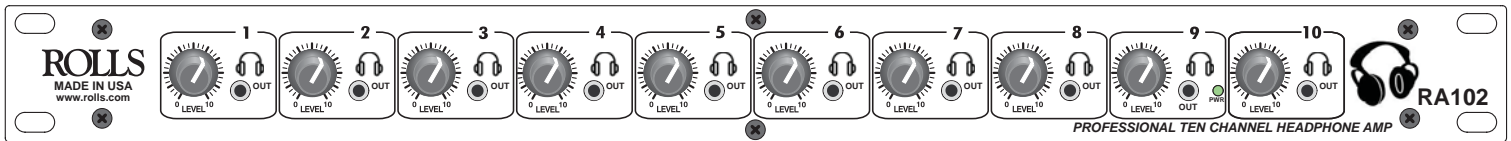

**MOST IMPROVED PRODUCT**

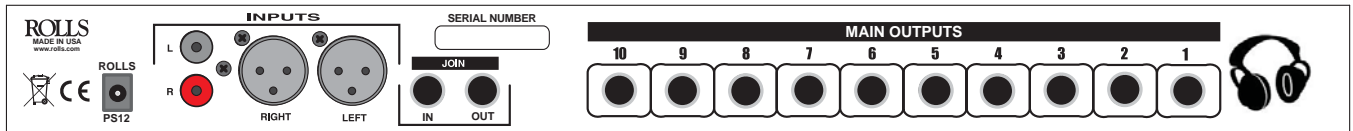

The HR78 is the winner for the second time in 3 months. We sold 300 of them last month and have a back order for 450 pieces!!!! I wished that I received that commission check!

**2 NEW PRODUCTS WILL BE SHIPPING IN APRIL**

This is the new RA102 it is a ten channel professional headphone amplifier. Some of its features are RCA and XLR balanced left and right inputs. A JOIN function that allows the direct connection of more than one RA102 to be chained together for large headphone installations. Each channel has a 1/4" headphone output on the rear of the unit and a 1/8" jack on the front for ease of operation (both jacks may be used at the same time if needed).

**NEW RA102 TEN CHANNEL PROFESSIONAL HEADPHONE AMPLIFIER**

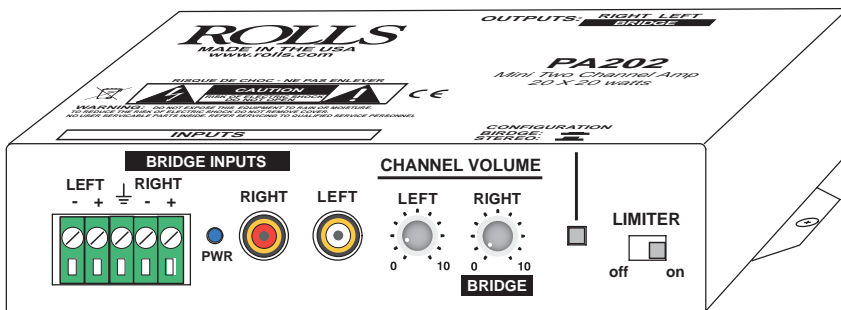

The JOIN section is for connecting multiple RA102's together without any signal loss or impedance issues.

**NEW PA202**

20 X 20 WATT MINI POWER AMP SHIPPING IN APRIL

The PA202 is a mini two channel amp. It features 20 X 20 watts in stereo and can be bridged at 40 watts. The PA202 is designed to be mounted in ceilings or anywhere a small high efficiency amp is needed. Designed for tight installations where heat may be an issue. The PA202 with its class D design will emit almost no heat. With balanced screw terminal barrier and RCA stereo inputs the PA202 has the inputs that are required for professional applications. The PA202 also features a switch able limiter circuit for added speaker protection. Separate volumes for left and right. All this is a very small package at 4.25" X 2.375" X 1.5" weighing in at only 1 pound. We are very excited for the release of this new Rolls product.

The RM203x will be changed to the new RM219 next month. The new version utilizes a PS27 DC power supply to make the unit even quieter and allow it to be used in DC only applications.
