

MAY 2009

A preview of new products

New products and updates to existing products we are working on:

New MT502 - a new Bellari product!! The MT502 is a moving coil to moving magnet cartridge transformer. It will complement the VP130 and VP530 with the ability to utilize a moving coil cartridge with a moving magnet phono preamp. This product will be available sometime in July. There will be more information on this product in the next news letter.

We are about ready to start the beta testing of the new RPQ160 Parametric EQ. It should be ready to ship in July.

MOST IMPROVED PRODUCT

The DU30b sales were up 600% last month!!! We are building larger production runs of the DU30b, but with it's increasing sales we are having a difficult time keeping them in stock. We will have more available May 25.

GCi404 COLOR CHANGE!!!

We have changed the color of the GCi404. The GCi404's are now black in color with white silk screening the older version was an off white chassis with black silk screening. All orders for the GCi404 are now shipping in the new color. All other features are the same as the old color version. Manual and bar code are the same. Please let every one know about the new color for the GCi404.

New Rolls PS115 adapter. This is a switching DC power supply adapter. It is compatible with 90V to 240V. No need for foreign adapters. It is being used with the VP130, VP530, HR78 and HR72. It will be designed into new products in the future. This is the quietest adapter Rolls has ever produced.

The RM203x is now changed to the new RM219. The new version utilizes a PS27 DC power supply to make the unit even quieter and allow it to be used in DC only applications. All orders for the RM203x will be shipped as RM219's. Let every one know about this change.

Rolls will be attending the INFOCOMM trade show June 14-18 in Orlando, FL. Booth #6027
