

**JUNE 2010**

**NOTICE as of July 1:**

The Rolls discount structure is being changed. The new discount structure will be based on yearly sales rather than order quantity. Call for more info.

**A preview of new products**

New products and updates to existing products we are working on:

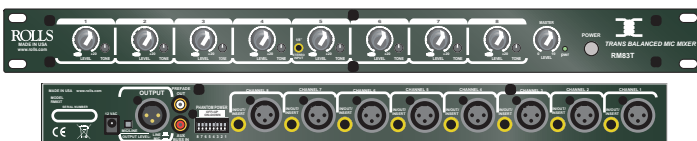

**NEW MX310  
NOW SHIPPING**

The MX310 is a new 3 channel mono mic mixer. It has individual switchable phantom power for each input. A headphone output for monitoring. Each channel has an independent level control and switchable low cut filter. A mic/line output switch will give the output XLR jack flexibility for plugging into almost any application. All in a compact all metal chassis for years of durable use. MADE IN USA.

**RM83T update**

The RM83T is still in testing. We are going to make yet another prototype. It might be a while before we have RM83T's ready to ship but we are most concerned about getting the unit perfect before proceeding.

**IMPROVED PRODUCTS SALES**

The MB15b sales were up 300% in June due to a large bulk order and higher than normal regular orders. We always have a large stock of MB15b's ready to ship out at all times, but please call and check availability for orders over 400 pcs.

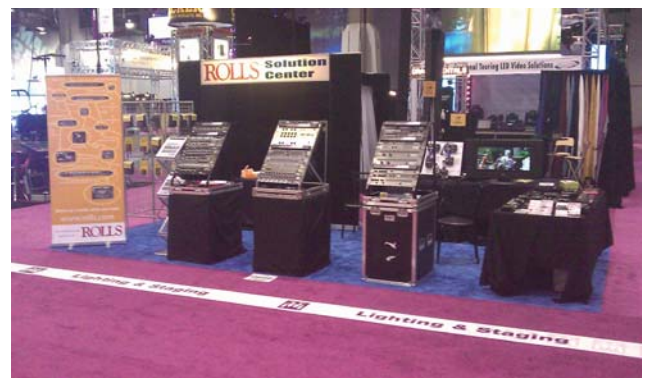

**NEW HA540**

**SOLD OUT!!!**

We sold the entire first production run of the HA540's in only a week. We will have more available for shipping in August.

**Rolls Booth at INFOCOMM**

Infocomm proves to be one the best annual trade shows for Rolls and the 2010 show was a huge success. We look forward to attending again next year.
